FEATURES

Strength And Comfort

The Mk®7.0 helmet features a super-strong HDPE shell combined with Revolution® wheel ratchet harness and Chamlon™ sweatband for maximum comfort and perfect fit.

Classic Design

The Mk®7.0 classic shell design features a rain channel around the brim, distinctive JSP shield, and raised 'stripe' on the crown.

Accessories

The Mk®7.0 is also compatible with EVO® helmet accessories, including thermal liners, neck capes, and chinstraps. Lamp brackets and cable loops are available as factory-fitted options.

3D Adjustment

The textile harness features unique 1-2-3-point depth settings. This offers the most precise fit attainable on a safety helmet.

Ventilation Options

Available with three ventilation options: non-vented, small vented, or large vented. Non-vented and small vent options provide electrical insulation up to 1000V, or choose large vents for optimal coolness and comfort.

Bespoke Your Mk®7.0

Strengthen corporate identity by applying a company logo to the Mk®7.0 safety helmet using the JSP Logo Express® service. Minimum order quantities and set-up charges apply.
