Baseworker™ Harness

Adjustable

Fully at 4 individual points

**Product Weight** 39.6g

4-pt Chinstrap

Designed to break when submitted to a force between 150N and 250N

Material

16mm Woven Nylon Webbing and Nylon Buckles

#### **FEATURES**

#### **SECURE FIT**

With four attachment points, the Baseworker™ chinstrap provides a secure fit and helps to hold the helmet firmly in place even during vigorous movement.

#### **ADJUSTABILITY**

The chinstrap is easy to adjust on the head. Size and anchorage point adjustment offer a tailored fit for different head sizes, increasing stability and comfort.

#### **COMPATIBILITY**

Specially designed for use together, the Baseworker™ chinstrap is tested and certified in combination with JSP® EVO® helmets to ensure full compatibility.

#### **EN 397 COMPLIANT**

Automatically releases under forces of 150-250N for safety in case the helmet or strap gets caught on something, in accordance with EN 397 requirements.

#### **QUICK RELEASE BUCKLE**

The chinstrap features an ergonomic quick release buckle allowing it to be unfastened easily for fast removal of the helmet.

#### **EASY FITTING**

Fitting the chinstrap is easy. Simply attach to the helmet shell, put the helmet on, then adjust the strap to a comfortably secure fit.
